EDUCATION

PhD, Information Science, Computer Science Minor

2019-Present

Cornell University, Thesis Committee: Tanzeem Choudhury, PhD (Advisor and Chair), Deborah Estrin, PhD, Fei Wang, PhD

Researching AI methods for ethical continuous mental health symptom monitoring. Based at Cornell Tech in New York City.

Bachelor of Science, GPA 3.91/4.00

2016

The Johns Hopkins University

Double Major in Biomedical Engineering (BME) and Applied Mathematics and Statistics (AMS), minor in Computer Science (CS), specializations in computational biology and optimization.

ACADEMIC TALKS

Developing Generative Adversarial Networks to Predict Individual-Level Mental Health Symptoms. Presented at the Cornell Artificial Intelligence Seminar, 25 Sept. 2020.

Predicting Indicators of Resilience Using Wearables and Smartphones. Presented at the Cornell Information Science Seminar, 15 Sept. 2020.

A System for Predicting Relapse in Schizophrenia Spectrum Disorders. Presented at the Precision Behavioral Health Virtual Launch at Cornell Tech, 14 Sept. 2020.

ONGOING RESEARCH

Predicting Mental Illness Using Unsupervised Representation Learning

PIs: Tanzeem Choudhury, PhD, Deborah Estrin, PhD (Cornell Tech), Fei Wang, PhD (Cornell University), David Mohr, PhD (Northwestern University), John Kane, MD (Northwell Health)

- Investigating how we can bring mobile sensing datasets together to predict shared symptoms of mental illness. Specifically focusing on depression, anxiety, and schizophrenia.
- Investigating unsupervised representation learning techniques (URL) for combining datasets for prediction.

Techniques to Improve Mental Health Prediction With Heterogeneous Data

PIs: Tanzeem Choudhury, PhD (Cornell Tech), Fei Wang, PhD (Cornell University)

- Creating novel methods to bring together heterogeneous mobile sensing datasets to improve mental health symptom prediction tasks. Specifically focused on sensor heterogeneity and missing data rates across individuals.
- Supervising two Master's students who are collaborating on this work for their research specialization project.

Predicting Indicators of Resilience Using Passive Sensing and EMA

PIs: Tanzeem Choudhury, PhD (Cornell Tech), Srijan Sen, MD, PhD (University of Michigan)

- Using mobile sensing data collected from a Fitbit and ecological momentary assessments (EMA) to find unobtrusive indicators of resilience associated with beginning a medical internship.
- Investigating novel density estimation techniques using deep generative models with mobile sensing data for predicting resilience indicators.
- Submitted for publication to the ACM Ubicomp Conference (currently undergoing revisions).

Integrating Behavioral Biomarkers to Improve Online Therapy

PIs: Tanzeem Choudhury, PhD, Deborah Estrin, PhD (Cornell Tech), Cristian Danescu-Niculescu-Mizil, PhD (Cornell University), David Mohr, PhD (Northwestern University), John Kane, MD (Northwell Health)

- Collaborating with an online therapy provider to investigate the use of behavioral biomarkers derived from mobile sensing data within online therapy for improved mental health and engagement.

Understanding Resident Physicians' Perceptions of Monitoring Burnout

PIs: Tanzeem Choudhury, PhD (Cornell Tech), John Kane, MD, John Young, MD (Northwell Health)

- Conducting semi-structured interviews to understand resident physicians' attitudes and concerns regarding the use of digital tools to monitor burnout and well-being.
- Objective is to provide design recommendations for future researchers creating interventions that leverage digital technologies to decrease resident physician burnout rates.

HONORS & AWARDS

Johns Hopkins University Honors, Spring 2016

Biomedical Engineering Departmental Honors, Spring 2016

Applied Mathematics and Statistics Departmental Honors, Spring 2016

Dean's List, Fall 2012 - Spring 2016

Biomedical Engineering Richard J. Johns Award, Spring 2016

Applied Mathematics and Statistics Mathematical Modeling Award, Spring 2015

TEACHING EXPERIENCE

Cornell Tech Masters Specialization Project Advisor, Fall 2020, Spring 2021, Fall 2021

Cornell Tech INFO 5610 Precision Behavioral Health, Fall 2020

Cornell Tech CS 5304 Data Science in the Wild, Spring 2020

Coder Academy Australia Post Tech Academy, Intro to Python and Machine Learning, 2019

PwC R Bootcamp, Spring 2017, Python Bootcamp, Fall 2017, Spring 2018

TEALS, Microsoft Philanthropies Introduction to Computer Science, Fall 2017, Spring 2018

Johns Hopkins BME 580.222 Signals, Systems and Controls, Spring 2016

Johns Hopkins AMS 550.111 Statistical Analysis 1, Fall 2015

PRIOR INDUSTRY AND RESEARCH EXPERIENCE

Educator & Course Developer

2018-2019

Coder Academy

- Developed and taught a two-year technology innovation boot camp for a large organization within Australia
- Created and taught data science courses and workshops to upskill adults on industry-relevant problems

Associate, Advisory Analytics
PricewaterhouseCoopers

2016-2018

- Drove large investments into community health by working with provider systems to analyze their patient populations using public/proprietary datasets, machine learning and simulation
- Worked on the creation of an application in PySpark hosted on a hadoop-environment to perform automated optimization and data mashing using a set of linear programming and k-nearest neighbor based algorithms
- Performed data cleaning and merging for a large pharmaceutical company to better track their product performance
- Investigated the use of an Agent Based Model (ABM) to assess the market potential for a new Pharmacogenomic (PGx) test

Researcher

2013-2014

Kennedy Krieger Neuroscience Department

- Researched the long-term effects of developmental brain injury using mouse models and patient EEGs

Researcher

2013

The Children's Hospital of Philadelphia Center for Autism Research (CAR)

- Analyzed the effects of biological reward on adults and children with and without Autism Spectrum Disorders (ASD) through preparing simulations and studying fMRI's

LEADERHIP

Cornell IS Grad. Student Association Admissions Representative, 2020-2021

Tau Beta Pi Maryland Alpha Chapter President, 2015-2016

Johns Hopkins Clinic Scheduling Team Leader, 2014-2016

THREAD Head of Family, 2015-2016

PROFESSIONAL ORGANIZATIONS

Tau Beta Pi Engineering Honors Society, 2014-Present

Upsilon Pi Epsilon Honor Society, 2016-Present
