EDUCATION

PhD, Information Science

2019-Present

Cornell University, Thesis Committee: Tanzeem Choudhury, PhD (Advisor and Chair), Deborah Estrin, PhD, Fei Wang, PhD

Researching methods for continuous mental health symptom management @ Cornell Tech in NYC.

2021 National Science Foundation Graduate Research Fellow

See: <https://www.nsfgrfp.org/>

Bachelor of Science, GPA 3.91/4.00

2016

The Johns Hopkins University

Double Major in Biomedical Engineering (BME) and Applied Mathematics and Statistics (AMS), minor in Computer Science (CS), specializations in computational biology and optimization.

ONGOING RESEARCH

Psychometric Machine Learning

In collaboration with Tanzeem Choudhury, PhD, Deborah Estrin, PhD (Cornell Tech), Fei Wang, PhD (Cornell University), David Mohr, PhD (Northwestern University)

Over the past decade, researchers have identified links between digital data types (eg, smart-phone sensing, social media) and mental health symptoms. Yet, research demonstrates that current modeling approaches do not make equitable predictions across individuals, are unreliable over time, and are not adaptable to the diverse data types that may exist throughout a population. In this work, we define “Psychometric Machine Learning” as modeling approaches that integrate the psychometric concepts of reliability and validity into their conceptualization and assessment. We thus aim to create modeling approaches to identify more reliable and valid digital biomarkers of mental health.

Using Digital Behavioral Biomarkers in Online Therapy

In collaboration with Tanzeem Choudhury, PhD, Deborah Estrin, PhD (Cornell Tech), Cristian Danescu-Niculescu-Mizil, PhD (Cornell University), David Mohr, PhD (Northwestern University), Fei Wang, PhD (Weill Cornell Medicine)

Collaborating with an online therapy provider to investigate how digital behavioral biomarkers can be integrated into online therapy to improve mental health and engagement outcomes.

Understanding Mental Health Clinicians’ Perceptions of Using Patient Generated Health Data

In collaboration with Deborah Estrin, PhD (Cornell Tech), Jodie Nghiem, BSc/BA, J.P. Pollak, PhD (Will Cornell Medicine)

Mental health clinicians often rely on infrequent snapshots of patient-reported symptoms for diagnosis and management of psychiatric conditions. Sources of patient-generated health data (PGHD) can provide these clinicians with additional real-time data between appointments to use in clinical decision making. This study is exploring mental health clinicians' preferences for integrating PGHD into their clinical decision making and workflow.

Understanding Resident Physicians' Perceptions of Monitoring Burnout

In collaboration with Emily Tseng, MEng, Tanzeem Choudhury, PhD (Cornell Tech), Khatiya Moon, MD, John Kane, MD, John Young, MD (Northwell Health)

Resident physicians work within psychologically demanding environments, which creates prolonged stress. This prolonged stress leads to burnout: characterized by emotional exhaustion, detachment, and reduced sense of accomplishment. In this study, we are conducting semi-structured interviews with resident physicians and supervising attending physicians to create a tool that can be used to support resident well-being.

INVITED TALKS

Predicting Behavioral Changes associated with Stress-Resilience. To be presented at ACM Ubicomp, 2022.

Mobile Sensing Data, Machine Learning, and Mental Health. Invited guest lecture at Cornell Tech's Machine Learning and Health Class, 2 Feb. 2022.

Identifying Mobile Sensing Indicators of Stress-Resilience. Invited guest lecture at Cornell Tech's AI in Health Class, 21 Nov. 2021.

Developing Generative Adversarial Networks to Predict Individual-Level Mental Health Symptoms. Presented at the Cornell Artificial Intelligence Seminar, 25 Sept. 2020.

Predicting Indicators of Resilience Using Wearables and Smartphones. Presented at the Cornell Information Science Seminar, 15 Sept. 2020.

A System for Predicting Relapse in Schizophrenia Spectrum Disorders. Presented at the Precision Behavioral Health Virtual Launch at Cornell Tech, 14 Sept. 2020.

HONORS & AWARDS

Cornell InfoSci Department Service Award, AY 2021-2022

Johns Hopkins University Honors, Spring 2016

Biomedical Engineering Departmental Honors, Spring 2016

Applied Mathematics and Statistics Departmental Honors, Spring 2016

Dean's List, Fall 2012 - Spring 2016

Biomedical Engineering Richard J. Johns Award, Spring 2016

Applied Mathematics and Statistics Mathematical Modeling Award, Spring 2015

TEACHING EXPERIENCE

Cornell Tech INFO 5375 Machine Learning in Health, Spring 2022

Cornell Tech Masters Specialization Project Advisor, Spring 2022, Spring 2021, Fall 2021

Cornell Tech INFO 5610 Precision Behavioral Health, Fall 2020

Cornell Tech CS 5304 Data Science in the Wild, Spring 2020

Coder Academy Australia Post Tech Academy, Intro to Python and Machine Learning, 2019
PwC R Bootcamp, Spring 2017, Python Bootcamp, Fall 2017, Spring 2018
TEALS, Microsoft Philanthropies Introduction to Computer Science, Fall 2017, Spring 2018
Johns Hopkins BME 580.222 Signals, Systems and Controls, Spring 2016
Johns Hopkins AMS 550.111 Statistical Analysis 1, Fall 2015

INDUSTRY AND RESEARCH EXPERIENCE

Graduate Research Intern 2021
UnitedHealth Group

- Researched methods to integrate continuous data streams (eg, wearable data) into collaborative care settings for improved mental health risk-stratification and treatment.

Educator & Course Developer 2018-2019
Coder Academy

- Developed and taught a two-year technology innovation boot camp for a large organization within Australia
- Created and taught data science courses and workshops to upskill adults on industry-relevant problems

Associate, Advisory Analytics 2016-2018
PricewaterhouseCoopers

- Drove large investments into community health by working with provider systems to analyze their patient populations using public/proprietary datasets, machine learning and simulation
- Worked on the creation of an application in PySpark hosted on a hadoop-environment to perform automated optimization and data mashing using a set of linear programming and k-nearest neighbor based algorithms
- Performed data cleaning and merging for a large pharmaceutical company to better track their product performance
- Investigated the use of an Agent Based Model (ABM) to assess the market potential for a new Pharmacogenomic (PGx) test

Researcher 2013-2014
Kennedy Krieger Neuroscience Department

- Researched the long-term effects of developmental brain injury using mouse models and patient EEGs

Researcher 2013
The Children's Hospital of Philadelphia Center for Autism Research (CAR)

- Analyzed the effects of biological reward on adults and children with and without Autism Spectrum Disorders (ASD) through preparing simulations and studying fMRI's

SERVICE

PhDs at Cornell Tech (PACT) Hiring Committee Officer, 2022

Big Brothers Big Sisters (BBBS) of NYC Big, 2021-2022

Cornell IS Grad. Student Association Admissions Representative, 2020-2021

Tau Beta Pi Maryland Alpha Chapter President, 2015-2016

Johns Hopkins Clinic Scheduling Team Leader, 2014-2016

THREAD Head of Family, 2015-2016

PROFESSIONAL ORGANIZATIONS

Tau Beta Pi Engineering Honors Society, 2014-Present

Upsilon Pi Epsilon Honor Society, 2016-Present
